

**HAWAIIAN COMMERCIAL &  
SUGAR COMPANY (Maui)**

A Division of Alexander & Baldwin, Inc.

Hawaii's largest producer of raw sugar is seeking qualified applicants who possess excellent administrative, personnel, & communication skills for the following job openings:

**Production Engineer**

Two positions available. Responsible for the shift operational requirements of the factory in the processing of cane & sugar while focusing on production rate, sugar recovery, workforce productivity and cost control. Responsible for design & installation of new factory equipment to improve productivity & efficiency. Minimum qualifications: College degree in Mechanical Engineering or closely related disciplines. Two years postgraduate experience with sugar cane processing equipment & systems.

**Supervisor, Factory Electrical**

Responsible for all electrical control, operational & maintenance functions, which include programming electrical process control systems, predictive, preventative & corrective measures while improving productivity & controlling cost. Minimum qualifications: College degree in Electrical Engineering or closely related disciplines. Two years postgraduate experience with electrical operations & maintenance of industrial machinery.

**Superintendent Electrical and Process Control**

Responsible for all electrical & process control programming, testing, maintenance & repair functions in support of operations which include predictive, preventative & corrective measures while improving productivity & controlling cost. Minimum qualifications: College degree in Electrical Engineering or closely related disciplines. Five years postgraduate experience with electrical & process control operations & maintenance of industrial systems.

Interested applicants may apply in person at the HC&S Human Resources office located next to the Puunene Post Office (Maui).
