AMERICAN SOCIETY OF MECHANICAL ENGINEERS - SAN DIEGO SECTION

ASME/IEEE HPS2004

HUMAN POWERED SUBMARINE RACE AND COMPETITION 2004

Safety Diver Application Form

Event Dates: Friday through Sunday, July 29 - Aug 1, 2004, Offshore Model Basin, Escondido, CA.

At HPS2004 Safety is the First Priority

Thank you for offering your skills and time for this exciting event. To maximize safety, we need to collect certain information about you. Please follow the procedure below. The minimum requirements for a volunteer safety diver: Open Water Diver Cert., at least 18 years old. HPS2004 will provide free air at the event and one free T-Shirt. All other personal dive equipment must be supplied by you.

You are volunteering to enforce the safety standards for this event as prescribed by the Chief Divemaster and HPS2004. Please be aware you will be diving in chilly water in a confined fresh-water basin 15ft deep, 48' wide and 300' long, with many other divers and mechanical submarines that have exposed turning props and sufficient momentum to cause severe injury in case of a collision with a diver; you will be surfacing and diving many times during a session in the water; many diver participants (the students piloting the subs and their support divers) are relatively inexperienced SCUBA divers. If you feel you are not fully informed of the inherent hazards and risks associated with participating in HPS 2004, feel free to discuss this with the Chief Divemaster when you are contacted.

Again, I thank you for your interest. If you have any general questions in the meantime, feel free to contact me.

-Paul Crivelli, HPS2004 Committee
Office 858-655-7508, home 619-255-0107
