**Subject:** 10-15 volunteers needed

The school year is winding down with only 4 weeks left of school. I will be sending out notes to teachers who's class was not selected this year on June 1st. I need your help to make that list to be as small as possible.

Engineers Week (EWeek) past but **33** classes still would like someone to visit the class to talk about technical careers. Volunteering consists of classroom visits that promote hands-on learning for math, science and engineering.

If you would be willing to talk about the importance of science and math at a local K-12 classroom, then select a class below and send me a note. I will then send you the teachers contact information. A technical background is not required. You will be a hero in these student's eyes.

**Signing up is simple:**

1. Review the list below
2. Select your first choice
3. Send a note to Lynn Guest at lguest@us.ibm.com with School Name and ID #
4. You will receive the teachers contact information, Name, Phone and E-mail
5. Contact the teacher - by Email and Phone to see if they still want a visitor then schedule the date and time -- ALL DONE!

The list of 33 classes is the largest we have ever had this late in the school year. With your help, it could be one class less. I hope you would be willing to spend a hour and visit one of these classes. Once you sign up the teacher's contact information will be sent to you. Once you receive that you need to contact the teacher to see if they still have time for a visit. If they want a visit, you can set up a date and time that works for the class and your work schedule. If not, please encourage the teacher to sign up again next year.

**SEE NEXT PAGE FOR OPPORTUNITIES**

School Name	City	ID #	Grade	Class Size	Teacher Comments
Carlmont High School,	belmont	112	12th Grade	80	Java Programming, Film Production and Web Publishing Class. I would like someone who does Macromedia Flash with web design and cartooning. I would like computer programmers in Java. I would like film and video engineers. Best Day: Friday Best Time 8-11am
Empire Gardens	San Jose	212	1st Grade	20	I have a spanish bilingual class that know little English. I can help translate if it is necessary. It is a combo 1/2 Something with shapes, patterns or measuring to the inch. Something to build is good. Best Month: Flexible Best Day: M, T,Th Best Time: 10:45-11:45
